

Weekly Report

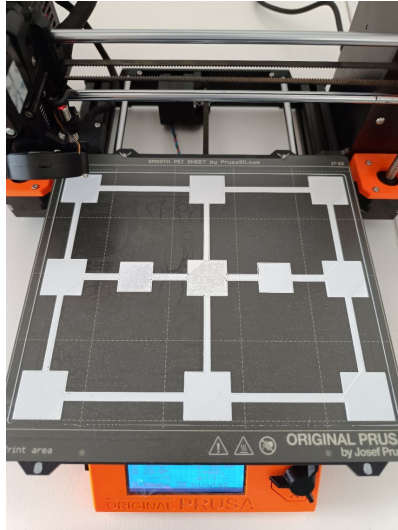

2025-05-26 to 2025-05-30

Printer Maintenance & Repairs

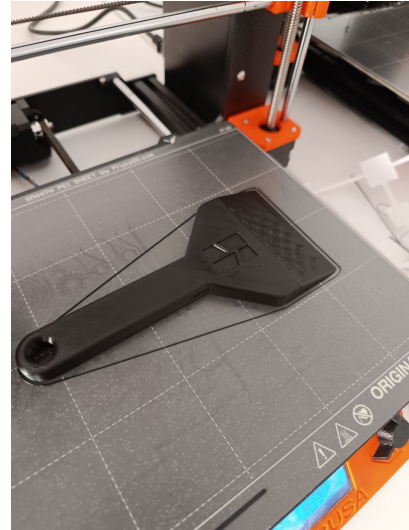

- Successfully fixed our third printer its now fully operational and printed test models without issues.
- Inspected and performed maintenance on the rest of the printers (cleaning, leveling, general checks).
- Ran a few test prints to verify everything the results were really solid.

Bed Leveling

Z offset

Test print - scrapper

Cookie Cutter Edge Project

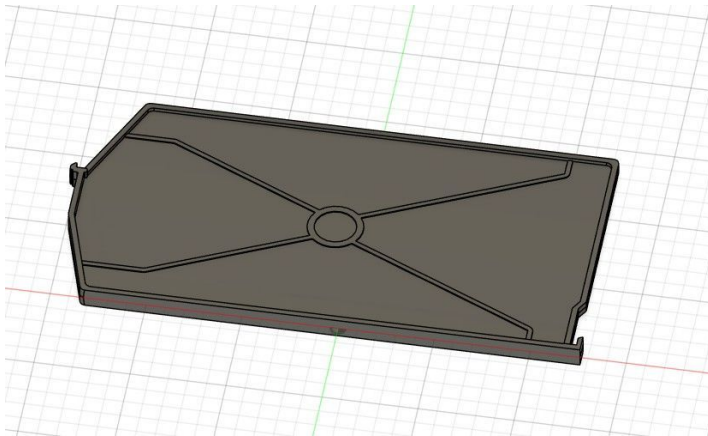

- Redesigned the cookie cutter project to improve the cutting edges.
- Printed the updated version looks better and should work more efficiently now.

Website Updates

- Website Major Updates
- Spent most of the week updating the Fablab website.
- Added a Membership section to explain user access and benefits.
- Created a new About Fablab page to give a better overview of our mission and activities.
- Built a Dedicated Equipment page where users can see detailed specs and photos of our machines. Worked on improving layout consistency and performance aiming for a better user experience on both desktop and mobile.
- Preparing more updates to go live soon.
